

Heno Jute Farrowing Mat 400

These jute mats are used as farrowing mats behind the sow or as nesting material. They provide a comfortable, hygienic environment and retain heat, increasing the piglets' chances of survival. The mats also provide extra grip and are 100% biodegradable.

In addition, these jute mats are excellent for use as enrichment for pigs and comply with European regulations for pig farmers to provide sufficient enrichment.

With their comfort, thermal insulation and environmentally friendly properties, Heno jute farrowing mats provide an ideal start for piglets.
