

Heno Protect Barrier

Heno Protect Barrier is a triple waterproof woven PE geotextile specifically designed to effectively inhibit root growth in a variety of applications.

Made from 100% woven polyethylene, it has exceptional strength and flexibility.

Functions & Benefits

- Protection of underground utility lines
- Root guidance to prevent uncontrolled spreading
- Suitable for horizontal and vertical use
- Reduce time and water consumption when watering trees and plants
- Separation of plants to preserve all plants
- Resistant to natural acids, alkalis, bacteria and mould
- Extremely strong and flexible
- UV-resistant

Product Specifications

Material	100% Polyethylene
Colour	Black
Weight	363 g/m ²
Roll length	25 - 50 m
Roll width*	100 – 133 – 150 – 200 – 300 – 400 cm

*Note: 300 cm and 400 cm available in 50 m roll only.

Technical Specifications

Perforation resistance	4,5 kN	EN ISO 12236
Tensile strength MD/CMD	34/31 KN/M	EN ISO 10319
Dynamic puncture resistance	19 mm	EN ISO 13433

Root penetration test report: Root penetration has been tested in accordance with CEN/TS 14416:2014 using the test method for determining the resistance of geosynthetic barriers to root penetration.

- Minimum durability of 50 years in natural soils with a pH between 4 and 9.
