

# Heno Geo Grow

A simple and sustainable alternative to grass sod, with 100% natural sheep's wool viscose fleece with integrated seeds and fertiliser. Ideal for landscaping and gardening.

## Available in four grass mixtures

1. **Fleece grass** for play and sports lawns, for a tough and low maintenance lawn.
2. **Shadow-tolerant grass** for areas with limited sunlight, with deep roots and drought tolerance.
3. **A drought tolerant grass** for sunny areas, developed with water saving properties.
4. **Landscape grass** with strong turf, fast germination and suitable for areas at risk of erosion and on lightly sloping ground.

## Benefits of wool fibre

- Absorbs and regulates humidity.
- Protects seeds from bird damage, erosion and wind dispersal.

### How to use

- Smoothing the surface.
- Roll out Heno Geo Grow loosely on the surface without stretching it.
- Lay the rolls with an overlap of about 5 cm.
- Secure with 4-6 Wooden Anchors per square metre.
