

Klavermat 200 + BF capillary matting

The Klavermat 200 capillary matting is a quality product that is produced from 100% new, high-quality synthetic fibers.

Every fiber has exactly the same properties. In combination with the unique 3-dimensional structure of the mat, this results in a very good capillary effect. A wide range of crops can be grown on the Klavermat.

The Klavermat 200 capillary matting is distinguished by its robustness, chemical resistance, constant operation and long service life. With the Klavermat it is possible to grow crops in a reproducible way and to quickly switch between different crops.

The Klavermat 200 + BF capillary matting offers a high capillary effect, in combination with a low water capacity. The abbreviation BF stands for black anti-algae foil. The foil is wrapped loosely on the capillary matting and has a fine perforation.

Klavermat 200 + BF

Weight: 200 gr/m²
 Anti-algae foil: Black – 30 µm
 Water capacity: 2,0 to 2,5 liter/m²

Standard Length: 75 meter
 Standard Width: 8 cm to 250 cm

Customization:

Henofa has punching and cutting machines to provide customization, for selling tables, cultivation gutters, container fields and deviating lengths. For more information, please send us a email on info@henofa.com.

Technical specification	Non-woven capillary matting	
<u>Composition:</u>	<u>Nominal:</u>	<u>Tolerance:</u>
Fiber composition	100% new synthetic fibers	
Weight (gr/m ²)	200	5%
Thickness (mm)	4,0	5%
Tensile-strength (kg/cm ²) Length-dry	3,0	
Tensile-strength (kg/cm ²) Width-dry	5,5	
Tensile-strength (kg/cm ²) Length-wet	3,0	
Tensile-strength (kg/cm ²) Width-wet	7,0	
Absorption capacity (ltr/m ²)	2,0 to 2,5	
Standard Length	75 meter	
Colour	Black
