

BWM 400+ capillary matting

Standard capillary matting, made from 100% recycled synthetic fibers.
Does not contain Jute or cotton.

The BWM 400+ capillary matting offers a high water capacity, in combination with a low capillary effect. An excellent choice for growers who renew the cultivation system every year. The BWM capillary matting is also very suitable for use on sales tables.

The BWM 400+ capillary matting has the highest weight and the highest water capacity of all BWM capillary mattings. Originally, the BWM 400+ was the standard mat in horticulture. However, with many cultivation and cultivation systems it is no longer necessary to have so much water under the plant. The BWM 400+ is now only used for crops where a higher water capacity is really desired, or where a higher humidity in the greenhouse should be shortened.

BWM 400+

Weight: 400 gr/m²
Watercapaciteit: 5,0 tot 6,0 liter/m²

Lenght: 40 and 50 meter
Width: 8 cm to 250 cm

Customization:

Henofa has punching and cutting machines to provide customization, for selling tables, cultivation gutters, container fields and deviating lengths. For more information, please send us a email on info@henofa.com.

Besides the standard version, the BWM 400+ is also available with foil and groundcover.
