

Heno Isofoil Bubble Foil

Our insulation range consists of the product Heno Isofoil bubble wrap. Heno Isofoil can be used directly as a professional insulation material and / or as a protection product against external influences.

Areas of application

- ❖ Insulating floors, roofs and sheds / garages
- ❖ (Temporary) sealing of construction projects in the cold winter months.

Heno Isofoil is made up of three layers of high-quality PE bubble foil, all sides are sealed so you are assured of a high-quality and airtight material.

The high insulation value provides a significant improvement in comfort and allows savings of up to 40%!

Advantages of Heno Isofoil:

- ❖ Heat and cold resistance
- ❖ Improvement of (living) comfort
- ❖ Highly transparent and UV resistant
- ❖ Easy to process
- ❖ Energy savings of up to 40% can be achieved

Properties Heno Isofoil:

- ❖ Stud diameter: 30 mm
- ❖ Number of layers: 3
- ❖ K value: 2.4 W / (m²K)
- ❖ Folding method: flat or folded
- ❖ Foil thickness: 50 µm

Standard dimensions:

1,20 x 50 Meter (plano)
1,50 x 50 Meter (plano)
2,00 x 50 Meter (plano)
2,40 x 50 Meter (plano)

Special Dimensions (sealed):

3,00 x 50 Meter (folded)
3,50 x 50 Meter (folded)
4,00 x 50 Meter (folded)
4,80 x 50 Meter (folded)
