

Heno Mulch Treedisc KJ800

Mulch Treediscs are used by growers to prevent the growth of weeds in pots. The Heno Mulch Treedisc KJ800 is free of chemical and / or harmful substances and not subject to quality differences. The KJ800 is partly biodegradable.

Functions and Benefits;

- ❖ Protect the plant against frost and low temperatures;
- ❖ Protect the roots against drying out, because evaporation is inhibited;
- ❖ Stimulates healthy and stable root growth;
- ❖ No need to use expensive chemical pesticides;
- ❖ Saving time, money and effort. Plants need water less often;
- ❖ Direct sale of plants, no longer necessary to remove weeds from the pots first.
