

Klavermat 125 + BGC capillary matting

The Klavermat 125 + BGC is a quality product that is produced from 100% new, high-quality synthetic fibers. Equipped with a black 100 gram / m² ground cover.

Every fiber has exactly the same properties. In combination with the unique 3-dimensional structure of the mat, this results in a very good capillary function. A wide range of crops can be grown on the Klavermat.

The Klavermat 125 + BGC capillary matting is distinguished by its robustness, chemical resistance, constant operation and long service life. With the Klavermat it is possible to grow crops in a reproducible way and to quickly switch between different crops.

The black ground cover is needed directly onto the capillary matting, resulting in a strong and robust product. The needling of fibers on the ground cover creates a perfect transition between fibers and covering materials.

The combined 2-layer product offers significant savings in time and installation costs, and it is also easy to clean. For this reason, it is frequently used on sales tables.

Klavermat 125 + BGC

Weight: 125 gr/m²
Ground cover: Black - (100 gr/m²)
Water capacity: 1,0 - 1,5 liter/m²

Length: 75 meter
Width: 8 to 250 centimeter

Customization

Henofa has punching and cutting machines to provide customization, for sales tables, cultivation gutters, container fields and deviating lengths. More information via info@henofa.com.

Technical specification	Non-woven capillary matting	
<u>Composition:</u>	<u>Nominal:</u>	<u>Tolerance:</u>
Fiber composition	100% new synthetic fibers	
Weight (gr/m ²)	125	5%
Thickness (mm)	3,0	5%
Tensile-strength (kg/cm ²) Length-dry	2,3	
Tensile-strength (kg/cm ²) Width-dry	2,8	
Tensile-strength (kg/cm ²) Length-wet	2,1	
Tensile-strength (kg/cm ²) Width-wet	2,7	
Water capacity (ltr/m ²)	1,0 tot 1,5	
Lenght	75 meter	
Color	Black
